

“The Stork is circling: Let’s Help in the Delivery”

“Born accessible publications from mainstream publishers need to be delivered to all distribution channels, but the publishing industry needs help from accessibility experts. Traditionally the DAISY Consortium community has been the source for expertise in making digital publications accessible.

This presentation will explore primary roles for the DAISY community to integrate with publishers to create born accessible publications. There is the goal to have all EPUB materials conform to the EPUB Accessibility specification. To support this, publishers need trusted experts to improve their production processes. On the marketing side, there are many opportunities for increasing market share for born accessible EPUB in our inclusive publishing society.”

The stork is circling; let's help in the delivery
